Textured Fine Art 425gsm	\$2.19	\$2.08
Adhesive Synthetic Paper	\$1.82	\$1.69
Adhesive Vinyl	\$2.00	\$1.88

All costs are estimates, based on the image above, printed on 24" x 30" media (24" rolls, 24" x 30" sheets, or closest equivalent) at 720 x 720 dpi, under standard operating temperatures and conditions. Prices used for UltraChrome K3™ Ink cartridges and the indicated media are estimated street prices on the date of the table.

The costs in this table are estimates only. Actual ink consumption and cost per square foot will vary based on many factors, such as image printed, frequency of cleaning cycles run, frequency of ink cartridge swapping, and frequency of printer use. Yields from the first cartridges used in the printer may be less, as some ink is used for the initial charging of the printing system.
